

Pseudocode Lab 10

Open the file to start (query_file.txt). The file will contain 2 dates. After that:

1. Read the lines in the file and check if it's in the same format as the correct one. If not, the program shall print out the error message.
2. The function is given in the codes to get access to the Sunrise Sunset Web API.
3. Calculate each date-lengths and compare the two. Get the difference between the two.
4. Convert the result to hours, minutes, and seconds.
5. Display the results of the final calculation to the program output.
